

Expanded Vocabulary List Used for Calculating the Climate Relevance Score ¹

biodiversity*	fauna
biology	gases
carbon*	geography
change	geology
climate*	global
climates	governance
climatic	greenhouse
co2	habitat
conditions	habitats
conservation	innovation
deforestation	monoxide
development	nitrogen
dioxide	pollutant
ecological	pollutants
ecology*	polluted
ecosystem	pollution*
ecosystems	protection
emission*	smog
emissions	sulfur
emit	sustainable*
emitted	tailpipe
environment*	viability
environmental	warming
environments	weather
excellence	wetland
